DETAILED ACTION

This action is responsive to the communication filed on January 25, 2006.

Response to Amendment

The examiner finds the applicant's argument persuasive and thus rescinds the previous rejection under 35 USC § 103.

Allowable Subject Matter

Claims 1-11 are allowed. The following is an examiner's statement of reasons for allowance:

With regards to the combination of 3GPP TS 33.203 and 22.228 as described in the prior office action, these references only disclose the communication of capabilities, not the transmission of a list of subscribed IM services.

With regards to application # 09/731,758, a 3GPP based system, including such things as the HSS and S-CSCF is disclosed. However, Faccin et al do not include inserting a list of services to which the UE is subscribed into any messages.

With regards to Patent # 6,871,070, a 3GPP system, including the IMS, HSS, UE, etc. is disclosed. However, Ejzak does not disclose inserting a list of

Art Unit: 2132

IM services to which the UE is subscribed into any of the messages. Instead, he focuses on the mechanics of providing communications while traveling between different types of home and serving systems.

With regards to Patent # 9,954,654, a 3GPP system, including the IMS, HSS, UE, etc. is disclosed. However, Ejzak's focus here is a communication system in which the features and services can be used by both packet-switched and circuit-switched UE. Although Ejzak does discuss the S-CSCF providing features and services to the UE, there is not a list of subscribed services being communicated.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
